Asian college of Journalism

Skills

Content & UX

- Usability testing
- Technical writing, UX writing, content strategy
- Information architecture, content structuring

Design & prototyping

Figma Framer Balsamiq

Development

React D3.js TypeScript

Summary

UX designer with a foundation in professional writing. I combine user research, interaction design, and clear writing to turn complex problems into usable products. My strength is bringing a writer's attention to clarity into every layer of the experience, from information architecture to the words on the screen.

Experience

Technical Writer

Sep 2024 - Present

Leading autonomous car company (via TaskUs)

- Improve clarity and usability of internal docs by restructuring content and workflows
- Own documentation across multiple workflows, improving coverage and reducing SME-flagged gaps
- Translate complex technical systems into clear, user-friendly content
- Collaborate with SMEs to validate accuracy and refine technical details
- Conduct peer reviews to ensure consistency in tone, structure, and guidelines

Correspondent (Health & Pharma)

Jul 2018 – Mar 2022

Thomson Reuters

- Delivered coverage at the intersection of health, pharma, and financial markets
- Simplified complex scientific and regulatory developments for a global audience
- Contributed to high-profile COVID-19 vaccine reporting with senior editors
- Mentored reporters, improving accuracy and newsroom efficiency
- Developed expertise in communicating complex medical and scientific information
